

MANIFESTATION MAGIC

How to be a successful Manifestor!

94%

of people say they get "Poor To Zero" results with the Law of Attraction*.

Why?

Most courses aren't based on solid scientific principles.

Revelation: Manifesting is different from the Law of Attraction.

Here's a simple manifesting technique that works every time, and is based on science.

The 5-Step

Manifesting Technique

1

FOCUS

Be ultra-specific about what you want

This triggers the RAS, the brain's spam filter, which will "filter" opportunities that could help you.

2

BOOST

Get uber-excited about your goal

This activates the amygdala, a mental "highlighter", which tells your brain what's important & keeps you super motivated.

3

RELEASE

Delete mental & emotional blockages

Use a releasing technique to remove internal blocks and obstacles that can destroy manifesting results. This also reduces cortisol /stress levels.

4

GRATITUDE

Feel thankful for your blessings

This restores your happiness and wellbeing levels, igniting your hypothalamus and putting you in the right mindset to manifest.

5

GO

Take the next small step!

Taking action reinforces neural pathways, through a positive feedback loop, allowing you to manifest quicker than ever.
